PROFESSIONAL EXPERIENCE

Web Developer

New York, New York

Leibowitz, Branding & Design (leibowitzdesign.com)

May 2023 - Present

- Led the creation of immersive front-end user experiences for WordPress sites, utilizing React to develop dynamic, responsive designs and custom block editor experiences.
- Leveraged PHP to engineer robust server-side functions, optimizing website functionality and performance.
- Excelled in integrating diverse third-party APIs, seamlessly connecting WordPress sites with external services and platforms, offering users enriched experiences with real-time data, such as social media feeds, e-commerce services, and payment gateways.
- Crafted bespoke themes and plugins, pushing the boundaries of WordPress to meet unique client needs and deliver high-quality web solutions.

Web Developer Intern

New York, New York

Unadat (unadat.com)

Jan. 2022 - June. 2022

- Spearheaded the creation and launch of an engaging social feed platform, boosting B2C user engagement through a collaborative team effort.
- Enhanced user experience by implementing AJAX for dynamic content loading and efficient interaction with historical data.
- Developed comprehensive social posting functionalities using PHP and MySQL, ensuring robust back-end to front-end integration.
- Streamlined development workflows by configuring GCP, Git, and MySQL Admin, optimizing the deployment process.

PROJECTS

theFCS - Events eCommerce Site

Oct. 2023

(thefcs.org)

- Engineered a comprehensive eCommerce solution for theFCS.org, a national not-for-profit dedicated to enhancing standards in financial marketing communications. The platform serves as a central hub for community engagement, educational events, and philanthropic initiatives.
- Implemented a robust membership subscription system, enabling users to sign up for various membership levels with recurring payments, supporting over 500+ users and 100+ orders per day.

MTA Data Feeds | Javascript

Dec. 2022

(jmcubano.com/MTA-Feeds)

- Developed a web application to retrieve NYC MTA's real-time transit data via MTA API, and to display subway trains' arrival times based on user selection, track active service alerts in the subway system.
